

To setup Outlook Express 5.x or 6.x on a PC:

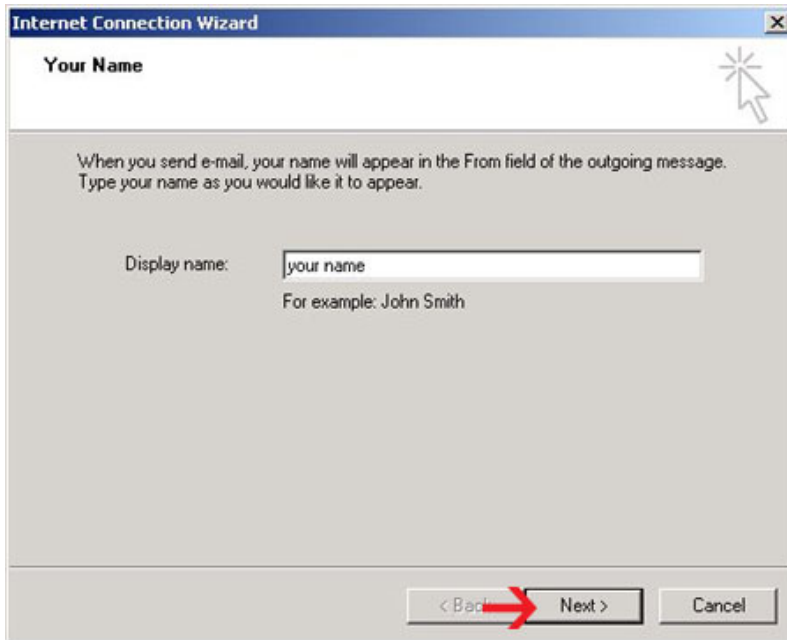

Open Outlook Express; select Accounts from the Tools menu.

2. Click the Mail tab to make it the active window.
3. Select Add and then Mail, which will start a wizard-based process.

4. Type Your Name as you wish it to be displayed on outgoing messages and then click the Next button.

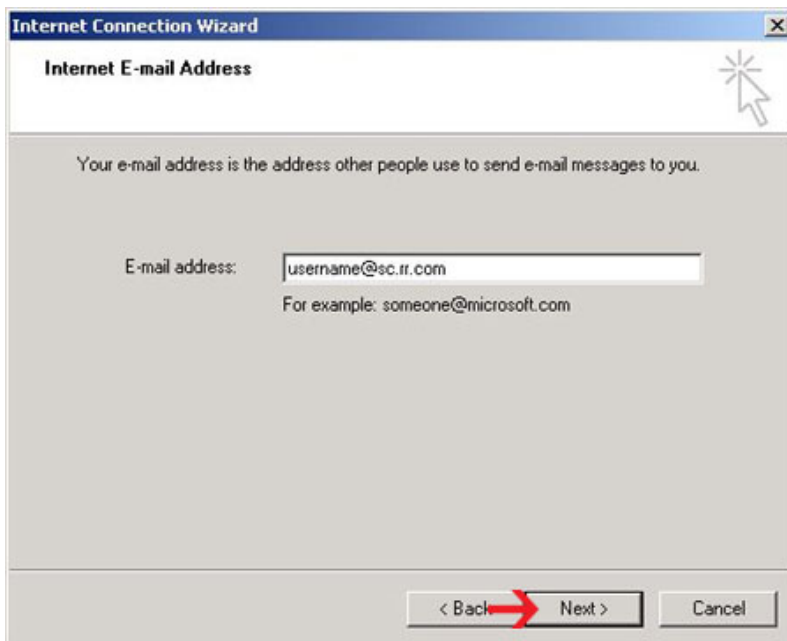

The screenshot shows a window titled "Internet Connection Wizard" with a sub-header "Your Name". The main text reads: "When you send e-mail, your name will appear in the From field of the outgoing message. Type your name as you would like it to appear." Below this is a text input field labeled "Display name:" containing the text "your name". Underneath the field is the text "For example: John Smith". At the bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel". A red arrow points to the "Next >" button.

5. Enter your Internet E-mail address in the field provided in the format "username@sc.rr.com."

Former Adelphia Customers will need to enter "username@roadrunner.com"

When complete, click the Next button.

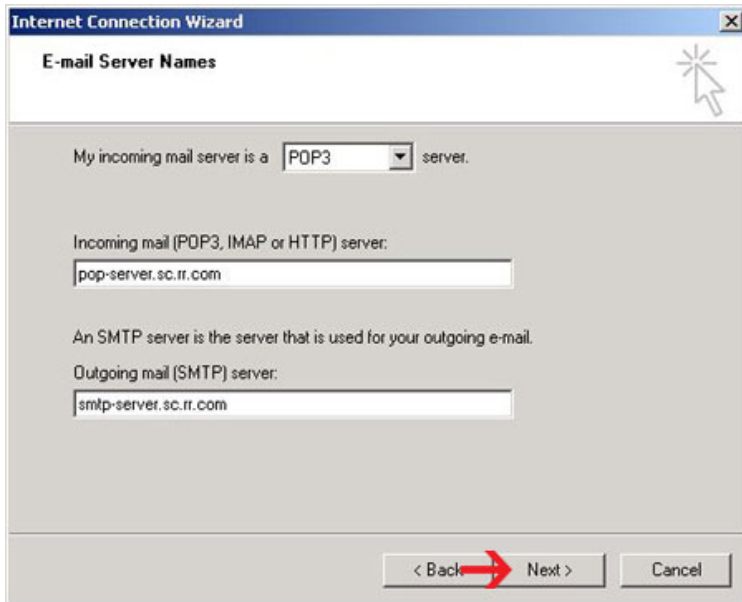

The screenshot shows a window titled "Internet Connection Wizard" with a sub-header "Internet E-mail Address". The main text reads: "Your e-mail address is the address other people use to send e-mail messages to you." Below this is a text input field labeled "E-mail address:" containing the text "username@sc.rr.com". Underneath the field is the text "For example: someone@microsoft.com". At the bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel". A red arrow points to the "Next >" button.

6. In the E-mail Server Names window, select POP3 from the drop-down list.
7. Enter pop-server.sc.rr.com in the Incoming Mail (POP3, IMAP or HTTP) server field.
8. Enter smtp-server.sc.rr.com in the Outgoing Mail (SMTP) field.

Please Note: Former Adelphia Customers will need to use
Incoming (POP3) Mail Server: pop-server.roadrunner.com
Outgoing (SMTP) Mail Server: smtp-server.roadrunner.com

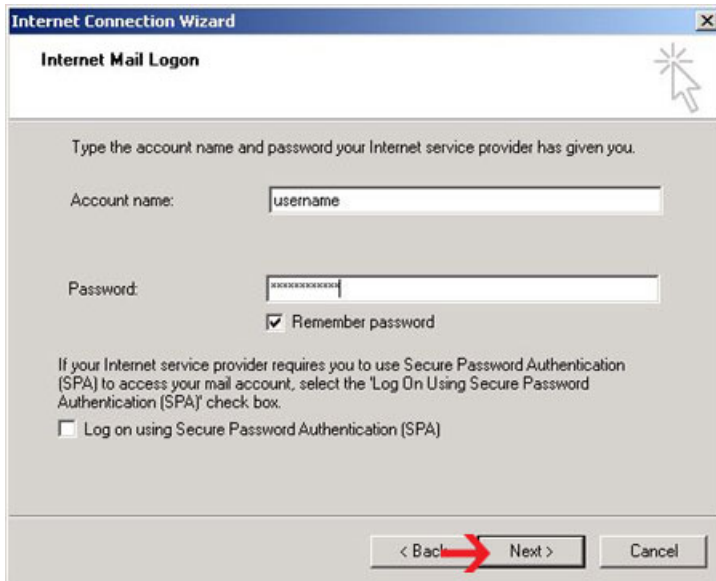

Click the Next button when done.

The screenshot shows a window titled "Internet Connection Wizard" with a sub-header "E-mail Server Names". The window contains the following fields and controls:

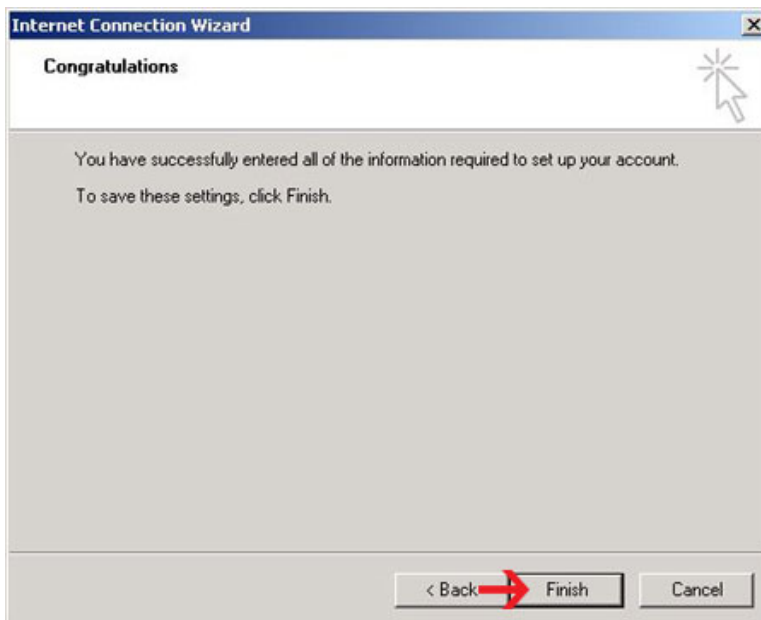

- A label: "My incoming mail server is a" followed by a dropdown menu set to "POP3" and the word "server".
- A label: "Incoming mail (POP3, IMAP or HTTP) server:" followed by a text input field containing "pop-server.sc.rr.com".
- A label: "An SMTP server is the server that is used for your outgoing e-mail." followed by a text input field containing "smtp-server.sc.rr.com".
- At the bottom, there are three buttons: "< Back", "Next >", and "Cancel". A red arrow points to the "Next >" button.

9. Enter your username in the POP Account Name Field and your password in the password field. If do not wish to supply your password each time you check for incoming mail, verify that the Remember password box is checked.
10. Click the Next button.

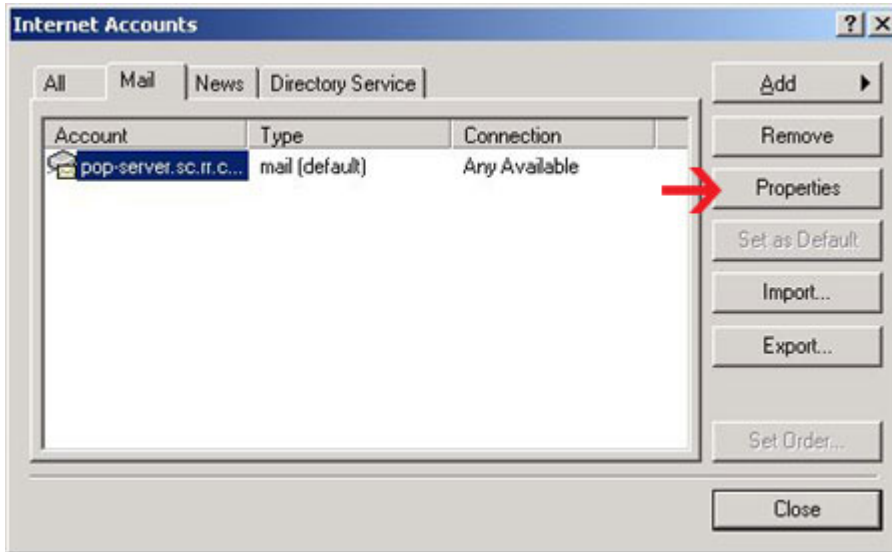

The screenshot shows the 'Internet Connection Wizard' dialog box, specifically the 'Internet Mail Logon' step. The window title is 'Internet Connection Wizard' and the subtitle is 'Internet Mail Logon'. The main text reads: 'Type the account name and password your Internet service provider has given you.' Below this, there are two input fields: 'Account name:' with the text 'username' and 'Password:' with a masked password 'XXXXXXXXXX'. A checkbox labeled 'Remember password' is checked. Below the password field, there is a note: 'If your Internet service provider requires you to use Secure Password Authentication (SPA) to access your mail account, select the 'Log On Using Secure Password Authentication (SPA)' check box.' and a checkbox labeled 'Log on using Secure Password Authentication (SPA)' which is unchecked. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. A red arrow points to the 'Next >' button.

11. Click the Finish button and the wizard will save your settings and return to the Internet accounts window.

The screenshot shows the 'Internet Connection Wizard' dialog box, specifically the 'Congratulations' step. The window title is 'Internet Connection Wizard' and the subtitle is 'Congratulations'. The main text reads: 'You have successfully entered all of the information required to set up your account. To save these settings, click Finish.' At the bottom, there are three buttons: '< Back', 'Finish', and 'Cancel'. A red arrow points to the 'Finish' button.

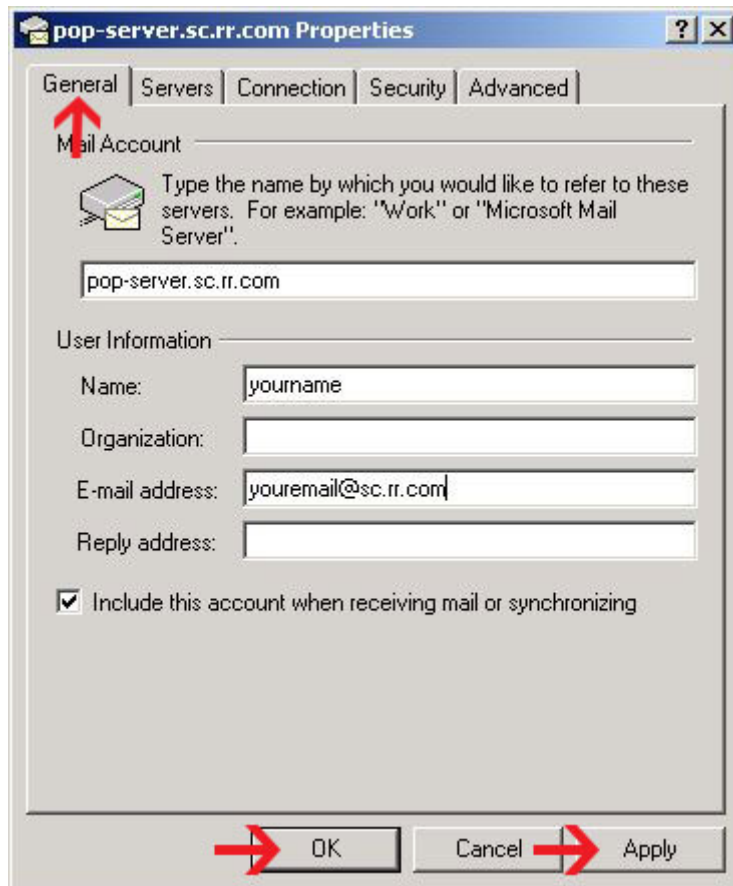

12. Note that the Account Name that is displayed by default is the name specified as the incoming (POP3) mail server, in this example, pop-server.sc.rr.com.
13. The Type of account (mail) is automatically displayed for you and the Connection type specified is automatically set for you as Any Available.
14. To edit or change the settings for an account, click to highlight the account name and then click the Properties tab.

15. Verify that the General tab is displayed. If you wish to change the Account name to a more easily recognizable or "friendly name" (for example, Road Runner), change the name displayed in the Mail Account field.

16. If you wish to edit your name and e-mail address settings, use the fields provided under User Information.

17. Click the Apply button. If you do not wish to edit information on other property tabs, click the OK button.

18. To edit the mail server address information, select the Servers tab.
19. Verify that the Incoming Mail (POP3) field displays pop-server.sc.rr.com.
20. The Outgoing mail (SMTP) field should display smtp-server.sc.rr.com.

Please Note: Former Adelphia Customers will need to use
Incoming (POP3) Mail Server: pop-server.roadrunner.com
Outgoing (SMTP) Mail Server: smtp-server.roadrunner.com

21. The Account name should display your username.
22. If you have elected to save your password, it is displayed as asterisks. If you are entering your password in this field for the first time or replacing it, it will display as asterisks.
23. When done, click the Apply button and then the OK button.
